VOLUME 42, 1999

PERGAMON

INTERNATIONAL JOURNAL OF HEAT AND MASS TRANSFER

AIMS AND SCOPE OF THE JOURNAL

The *International Journal of Heat and Mass Transfer* seeks to provide a central vehicle for exchange of basic ideas in heat and/or mass transfer between research workers and engineers located throughout the world. Only those papers that convey original unpublished research of permanent interest—analytical, numerical and/or experimental—and featuring explicitly heat and/or mass transfer, will be accepted for publication. In all cases, the highest priority will be given to those contributions which increase our basic understanding of transfer processes and of their application to engineering problems.

As a service to the readers, an international bibliography of recent papers in heat and mass transfer listed by title, author and source appears regularly in the *International Journal*. Reviews of new books on heat and mass transfer are also published in the journal.

Technical notes may also be submitted. In some cases, an alternate route for a much faster publication of a technical note or a short paper may be the *International Communications in Heat and Mass Transfer* journal. This companion journal, published by Elsevier Science Inc. with the same Board of Editors, serves as a world forum for the rapid dissemination of new ideas, new measurement techniques, preliminary findings of ongoing investigations, discussions, and criticisms in the field of heat and mass transfer.

BOARD OF EDITORS

A. R. BALAKRISHNAN (Associate Editor for India)
Department of Chemical Engineering
Indian Institute of Technology
Madras 600 036, India

A. BRIGGS (Associate Editor)
Department of Engineering
Queen Mary and Westfield College
University of London
London E1 4NS, U.K.

E. HAHNE
Institut für Thermodynamik und Wärmetechnik
Universität Stuttgart
Pfaffenwaldring 6
D-70550 Stuttgart, Germany

J. P. HARTNETT (Coordinating Editor)
Energy Resources Center
University of Illinois at Chicago
851 South Morgan Street, MC 156
Chicago, IL 60607-7054, U.S.A.

M. LEBOUCHE
Laboratoire d'Energétique et de Mécanique Théorique et Appliquée
CNRS URA 875
2, Avenue de la Forêt de Haye
BP 160, 54504 Vandoeuvre-lès-Nancy Cedex, France

A. I. LEONTIEV
Moscow State Technical University
2-nd Baumanskaya Str. 5
Moscow 107005, Russia

A. MAJUMDAR (Asssociate Editor)
Department of Mechanical Engineering
University of California
Berkeley, CA 94720-1740, U.S.A.

O. G. MARTYNENKO
Heat and Mass Transfer Institute
Byelorussian Academy of Sciences
25 Podlesnaya, Minsk, Belarus

W. J. MINKOWYCZ (Coordinating Editor)
Mechanical Engineering (M/C 251)
University of Illinois at Chicago
842 West Taylor Street, 2049 ERF
Chicago, IL 60607-7022, U.S.A.

S. NISHIO (Associate Editor)
Institute of Industrial Science
University of Tokyo
22-1 Roppongi 7-chome
Minato-ku, Tokyo 106, Japan

X. F. PENG (Associate Editor)
Thermal Engineering Department
Tsinghua University
Beijing 100084, China

J. W. ROSE
Department of Engineering
Queen Mary and Westfield College
University of London
London E1 4NS, U.K.

K. SPINDLER (Associate Editor)
Institut für Thermodynamik und Wärmetechnik
Universität Stuttgart
Pfaffenwaldring 6
D-70550 Stuttgart, Germany

K. SUZUKI
Department of Mechanical Engineering
Kyoto University, Yoshidahonmachi
Kyoto 606-8501, Japan

C.-L. TIEN
Department of Mechanical Engineering
University of California
Berkeley, CA 94720-1740, U.S.A.

B. X. WANG
Thermal Engineering Department
Tsinghua University, Beijing 100084
China

HONORARY EDITORIAL ADVISORY BOARD

Co-Chairmen: E. R. G. ECKERT, *University of Minnesota, Minneapolis, MN* 55455, *U.S.A.*
U. GRIGULL, *Technische Universität, München, Germany*

VOLUME CONTENTS

January, Number 1

R. E. CRITOPH, M. K. HOLLAND and M. FISHER	1	Comparison of steady state and transient methods for measurement of local heat transfer in plate fin-tube heat exchangers using liquid crystal thermography with radiant heating
W.-S. FU and H.-C. HUANG	13	Effects of a random porosity model on heat transfer performance of porous media
V. A. F. COSTA	27	Unification of the streamline, heatline and massline methods for the visualization of two-dimensional transport phenomena
W.-M. YAN, H.-Y. LI and D. LIN	35	Mixed convection heat transfer in a radially rotating square duct with radiation effects
A. DE MATOS, F. A. A. PINHO and A. SILVEIRA-NETO	49	Large-eddy simulation of turbulent flow over a two-dimensional cavity with temperature fluctuations
M. SOUHAR, S. ANISS and J. P. BRANCHER	61	Convection de Rayleigh–Benard dans les liquides magnetiques en cellule de Hele–Shaw annulaire
R. SIEGEL	73	Radiative exchange in a parallel-plate enclosure with translucent protective coatings on its walls
J. P. LONGTIN, K. HIJIKATA and K. OGAWA	85	Laser-induced surface-tension-driven flows in liquids
J.-F. MERCIER and C. NORMAND	95	Flow driven by a hot wire immersed in a horizontal liquid layer
R. SAVINO and R. MONTI	111	Convection induced by residual-g and g-jitters in diffusion experiments
H. M. PARK, O. Y. CHUNG and J. H. LEE	127	On the solution of inverse heat transfer problem using the Karhunen–Loève Galerkin method
D. LESNIC, L. ELLIOTT, D. B. INGHAM, B. CLENNELL and R. J. KNIPE	143	The identification of the piecewise homogeneous thermal conductivity of conductors subjected to a heat flow test
T. ELPERIN and A. FOMINYKH	153	Combined mass and heat transfer during nonisothermal absorption in gas–liquid slug flow with small bubbles in liquid plugs

I. CUESTA, F. X. GRAU, F. GIRALT and Y. COHEN 165 Air–water mass transfer of organics from shallow ponds under laminar recirculation

M. A. HOSSAIN, M. A. ALIM and D. A. S. REES 181 The effect of radiation on free convection from a porous vertical plate

Technical Note

F. KOWSARY 193 A computationally efficient method for Monte Carlo simulation of diffuse radiant emission or reflection

January, Number 2

O. G. MARTYNENKO 197 Heat and mass transfer bibliography: CIS works

A. BARLETTA and E. ZANCHINI 219 Three-dimensional propagation of hyperbolic thermal waves in a solid bar with rectangular cross-section

T.-M. LIOU and C. C. CHEN 231 Heat transfer in a rotating two-pass smooth passage with a 180° rectangular turn

M. C. HIPWELL and C. L. TIEN 249 Short time-scale radiative transfer in light-emitting porous silicon

CH. RANGANAYAKULU and K. N. SEETHARAMU 263 The combined effects of wall longitudinal heat conduction, inlet fluid flow nonuniformity and temperature nonuniformity in compact tube–fin heat exchangers: a finite element method

A. LAOUADI and M. LACROIX 275 Thermal performance of a latent heat energy storage ventilated panel for electric load management

J. BOSCARY, J. FABRE and J. SCHLOSSER 287 Critical heat flux of water subcooled flow in one-side heated swirl tubes

P. JOLLY et N. MAZET 303 Optimisation de la diffusion du gaz dans des matériaux réactifs, siège de transferts de chaleur, de masse et d'une réaction chimique

A. IANČIĆ, A. OLIVA, C. D. PÉREZ SEGARRA and M. COSTA 323 Heat transfer simulation in vertical cylindrical enclosures for supercritical Rayleigh number and arbitrary side-wall conductivity

C.-Y. YANG 345 The determination of two heat sources in an inverse heat conduction problem

S. D. HARRIS, D. B. INGHAM and I. POP 357 Unsteady mixed convection boundary-layer flow on a vertical surface in a porous medium

Technical Notes

J. D. CHUNG, J. S. LEE, S. T. RO and H. YOO 373 An analytical approach to the conduction-dominated solidification of binary mixtures

Z. Guo and H. J. Sung 379 Conjugate heat and mass transfer in metal hydride beds in the hydriding process

Announcement

D. Gobin and P. Le Quéré 383 Coupled convection and heat transfer in solid–liquid phase change: a comparison exercise for numerical codes simulating melting in the presence of natural convection in the melt

February, Number 3

Y. Wang and Y. Bayazitoglu 385 Wavelets and discrete ordinates method in solving one-dimensional nongray radiation problem

Q. Zhang, T. H. Jackson, A. Ungan and D. Gao 395 Numerical modeling of continuous hybrid heating of cryopreserved tissue

Z.-C. Chang, M.-S. Hung, P.-P. Ding and P.-H. Chen 405 Experimental evaluation of thermal performance of Gifford–McMahon regenerator using an improved single-blow model with radial conduction

W. Fröhlingsdorf and H. Unger 415 Numerical investigations of the compressible flow and the energy separation in the Ranque–Hilsch vortex tube

D.-Y. Lee and K. Vafai 423 Analytical characterization and conceptual assessment of solid and fluid temperature differentials in porous media

M. Z. Saghir and M. R. Islam 437 Double diffusive convection in dual-permeability, dual-porosity porous media

K. J. Hays-Stang and A. Haji-Sheikh 455 A unified solution for heat conduction in thin films

M. J. Al-Khawaja, R. K. Agarwal and R. A. Gardner 467 Numerical study of magneto-fluid-mechanic combined free-and-forced convection heat transfer

J. L. Lage 477 The implications of the thermal equilibrium assumption for surrounding-driven steady conduction within a saturated porous medium layer

E. Buyruk, H. Barrow and I. Owen 487 Heat transfer in laminar flow in a concentric annulus with peripherally varying heat transfer

C. Y. Soong and W. M. Yan 497 Development of secondary flow and convective heat transfer in isothermal/iso-flux rectangular ducts rotating about a parallel axis

G. Fabbri 511 Optimum profiles for asymmetrical longitudinal fins in cylindrical ducts

I. HASHIM and S. K. WILSON 525 The effect of a uniform vertical magnetic field on the linear growth rates of steady Marangoni convection in a horizontal layer of conducting fluid

Z.-G. FENG and E. E. MICHAELIDES 535 Unsteady mass transport from a sphere immersed in a porous medium at finite Peclet numbers

G. Z. GERSHUNI, A. K. KOLESNIKOV, J. C. LEGROS and B. I. MYZNIKOVA 547 On the convective instability of a horizontal binary mixture layer with Soret effect under transversal high frequency vibration

Y. KAMOTANI, S. OSTRACH and J. MASUD 555 Oscillatory thermocapillary flows in open cylindrical containers induced by CO_2 laser heating

H. Y. LI 565 Estimation of thermal properties in combined con- duction and radiation

D. MORVAN, M. EL GANAOUI and P. BONTOUX 573 Numerical simulation of a 2-D crystal growth problem in vertical Bridgman–Stockbarger furnace: latent heat effect and crystal–melt interface morphology

February, Number 4

S. CHEVALIER, D. BERNARD and N. JOLY 581 Natural convection in a porous layer bounded by impervious domains: from numerical approaches to experimental realization

V. P. LEBEDEV, V. V. LEMANOV and V. I. TEREKHOV 599 Heat transfer in a wall jet at high turbulence of cocurrent stream

I. ZIÓŁKOWSKA, M. DOLATA and D. ZIÓŁKOWSKI 613 Heat and momentum transfer in fluids heated in tubes with turbulence generators at moderate Prandtl and Reynolds numbers

K. GHORAYEB, H. KHALLOUF and A. MOJTABI 629 Onset of oscillatory flows in double-diffusive convection

S. AVAGLIANO, N. BIANCO, O. MANCA and V. NASO 645 Combined thermal and optical analysis of laser back-scribing for amorphous-silicon photovoltaic cells processing

J. F. T. PITTMAN, J. F. RICHARDSON and C. P. SHERRARD 657 An experimental study of heat transfer by laminar natural convection between an electrically-heated vertical plate and both Newtonian and non-Newtonian fluids

A. K. SHEHATA, J. D. YANG, A. C. WEST and V. MODI 673 Effect of an unsteady external flow on mass transfer to cavities

V. SRZIC, H. M. SOLIMAN and S. J. ORMISTON 685 Analysis of laminar mixed-convection condensation on isothermal plates using the full boundary-layer equations: mixtures of a vapor and a lighter gas

Y.-Y. YAN and T.-F. LIN 697 Condensation heat transfer and pressure drop of refrigerant R-134a in a small pipe

J.-S. YOO 709 Transition and multiplicity of flows in natural con- vection in a narrow horizontal cylindrical annulus: $Pr = 0.4$

G. R. IYER and S. YAVUZKURT 723 Comparison of low Reynolds number k–Â models in simulation of momentum and heat transport under high free stream turbulence

C. X. LIN and M. A. EBADIAN 739 The effects of inlet turbulence on the development of fluid flow and heat transfer in a helically coiled pipe

J. PALLARES F. X. GRAU and F. GIRALT 753 Flow transitions in laminar Rayleigh–Bénard convection in a cubical cavity at moderate Rayleigh numbers

Technical Note

H. AZUMA, S. YOSHIHARA, M. ONISHI, K. ISHII, S. MASUDA and T. MAEKAWA 771 Natural convection driven in CO_2 near its critical point under terrestrial gravity conditions

March, Number 5

Y. ZHANG and A. FAGHRI 775 Melting of a subcooled mixed powder bed with constant heat flux heating

V. K. GARG 789 Heat transfer on a film-cooled rotating blade using different turbulence models

A. G. FEDOROV and R. VISKANTA 803 Analysis of transient heat/mass transfer and adsorption/desorption interactions

J. LEE, S. H. KANG and Y. S. SON 821 Experimental study of double-diffusive convection in a rotating annulus with lateral heating

N. ALLEBORN, H. RASZILLIER and F. DURST 833 Lid-driven cavity with heat and mass transport

D. W. TANG and N. ARAKI 855 Wavy, wavelike, diffusive thermal responses of finite rigid slabs to high-speed heating of laser-pulses

T. S. ZHAO 861 Coupled heat and mass transfer of a stagnation point flow in a heated porous bed with liquid film evaporation

Q. CHEN and V. MODI 873 Mass transfer in turbulent impinging slot jets

M. S. EL-GENK and H. H. SABER 889 Determination of operation envelopes for closed, two-phase thermosyphons

W. RIVERA and R. BEST 905 Boiling heat transfer coefficients inside a vertical smooth tube for water/ammonia and ammonia/lithium nitrate mixtures

E. WURTZ, J.-M. NATAF and F. WINKELMANN 923 Two- and three-dimensional natural and mixed convection simulation using modular zonal models in buildings

R. E. M. MORALES, A. BALPARDA and A. SILVEIRA-NETO 941 Large-eddy simulation of the combined convection around a heated rotating cylinder

R. L. CORNELISSEN and G. G. HIRS 951 Thermodynamic optimisation of a heat exchanger

March, Number 6
